

# Meet Your Audiologist

*When talking with patients, I try to understand their needs and situations, so I can better help them select a solution to their hearing problems. If it's a medical issue, I want to help them and their doctor find the cause so it can hopefully be treated.*

## Laura Schwenker, AuD

### Why I Chose Audiology

"I have always had a keen interest in the medical field. I looked into physical therapy and nursing before deciding on audiology. I love that I get to work with people of all ages, from newborns and their families to those over 100. I learn something from each of them."
