

Meet Your Gastroenterologist

Ayman Alzubi, MD

I chose Gastroenterology as my specialty as I've witnessed the profound impact GI issues can have on the body. I now have the opportunity to diagnose, treat and manage conditions that are often complex and multifaceted.

Why I Chose Health Care

I selected a career in healthcare because I have always had a desire to heal people. This passion for helping others naturally evolved into a commitment to healthcare, where I saw the potential to combine my compassion with the knowledge and skills necessary to bring about real change.
